

Environmental Policy

Chememan Public Company Limited (the “Company”) is one of Thailand’s leading producers of lime and limestone-based chemical products. The Company conducts its business with social responsibility and places strong importance on environmental protection through the efficient use of energy and natural resources, with the aim of achieving sustainable business and environmental development together. The Company recognizes that the environment is an important part of business operations and is committed to implementing an environmental management system to protect the environment, prevent pollution, and maintain a good environment as follows:

1. To implement and continuously improve an appropriate environmental management system in strict compliance with applicable laws, regulations, and other relevant requirements.
2. To establish environmental objectives and targets relating to air pollution, noise pollution, dust pollution, water pollution, and environmental operations, including monitoring, performance assessment, and management review to ensure continuous improvement and development.
3. To promote the efficient use of water, electricity, fuel, and other resources to maximize value in all business activities, including encouraging the use of recyclable and reusable materials.
4. To manage, treat, prevent, and control wastewater, emissions, and dust generated from production processes and transportation activities to minimize environmental impacts.
5. To reduce waste, including municipal waste and industrial waste, through the continuous implementation of the 3Rs principle (Reduce, Reuse, Recycle) to achieve the goal of Zero Waste to Landfill.
6. To support adequate resources in terms of personnel, time, budget, and employee training, including relevant stakeholders and communities, to strengthen environmental awareness and promote compliance with the Company’s environmental standards and practices. Environmental responsibility is considered a duty of all employees.

To achieve the objectives of this Policy, the Company shall undertake appropriate actions to support an effective environmental management system in accordance with established standards. This Environment Policy shall be communicated to all employees, contractors, and service providers to ensure awareness, understanding, and effective implementation and shall be made available to the public.
